## GrafxMate Plus for Windows Make Your Console Screen Prints Work For You!

TiPS has made a revolutionary change in the GrafxMate Product which now runs on your Windows PC instead of a hardware box connected to the printer.

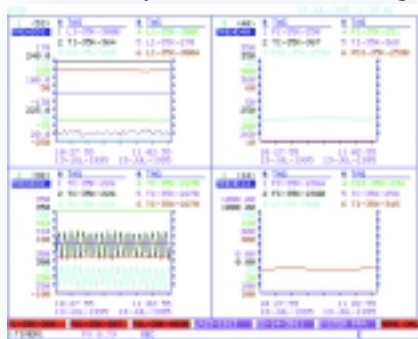

GrafxMate Plus allows you to store your **PROVUE®**, **RS3®**, **Honeywell**, or **Bailey** Console Screen Prints on your hard drive as a graphical image (**.BMP or .GIF**). Once on your PC, you can print the graphic to any printer on your network; no longer are you forced to

Simply Press  
[PrintScreen] from  
your DCS Operator  
Station and the screen  
print is automatically  
saved on your PC.

- Use your screen print as a template to build new graphics in your MMI program like Intellution or Wonderware
- Or just back them up to your network. GrafxMate Plus is your first ever **Screen Print Historian!**

- View Images using MS Paint or any Web Browser

use an HP Desk Jet® Printer! Of course, you can still **AutoPrint** directly to your printer as the screen prints are performed. And because the screen prints are time/date

stamped, you could just archive them away as historical documentation.

## Now you can do things with Console Screen Prints never before possible. Here are a few examples:

- **E-mail** your screen prints as an attachment to anyone anywhere
- Embed your graphics into your **Desktop Applications** like MS Word, Excel, Access or PowerPoint for presentations, reports, documentation, analysis, etc.

## Advantages of GrafxMate Plus over Hardware GrafxMate:

- Supports up to 6 ports for one price
- Not reliant on HP DeskJet Color Printer
- Can print across a network
- Can print to black and white printer
- Much faster print time (**up to 3 times faster**) than Hardware GrafxMate (see benchmarks)
- Save images in .BMP or **super compressed .GIF** graphical image file
