### **TiPS Joins the Rockwell Automation Encompass™ Program with LogMate®**

TiPS today announced the acceptance of the LogMate® Alarm Management Software System into the Rockwell Automation Encompass Partner Program. LogMate AMS gives customers access to a rich suite of alarm management tools that easily integrates into the FactoryTalk® environment. LogMate in conjunction with FactoryTalk services creates a foundation for continuous improvement of automation asset performance and productivity.

The alarm management message resonates well with the Rockwell Automation FactoryTalk objectives of "...making business decisions that improve responsiveness, increase productivity, reduce costs and assure regulatory compliance." Since alarm management is a natural part of improving plant floor performance, a relationship with TiPS made sense.

"We are extremely excited about this relationship," adds Bob Weibel, president of TiPS. "LogMate delivers value to Rockwell Automation customers and we believe that the Encompass program will give us insight into an entirely fresh perspective on what alarm management tools should provide."

TiPS will be exhibiting at the 2007 Automation Fair® in Chicago, November 14<sup>th</sup> and 15<sup>th</sup>, booth 458.

#### About the Encompass Program:

The Encompass Program is a product referencing program designed to identify, qualify, and jointly market third-party manufactured products that complement the breadth of world-class products developed by Rockwell Automation. Information on the Encompass program is available on the Web at [www.rockwellautomation.com/encompass](http://www.rockwellautomation.com/encompass).

#### About Rockwell Automation:
